Chandra Archive Collection: Six objects ranging in location from within the Milky Way to billions of light years away.
(Credit: NASA/CXC/SAO)

Caption: These six images represent the potential for new images and discoveries housed in the Chandra Data Archive. To celebrate October as American Archive Month, these images – which include supernova remnants, pulsars, black holes, and clusters of galaxies – are being released. Each image represents data that are available to both the professional scientific community as well as the general public.
