

Visit yesterday's High  
energy cosmos

TODAY!

PROMISING THE  
UNEXPECTED &  
THE EXCITING!

Our “X-ray universe” refers to the Universe as observed with telescopes designed to detect X-rays. X-rays are produced in the cosmos when matter is heated to millions of degrees. Such temperatures occur where high magnetic fields, extreme gravity, or explosive forces, hold sway.

***Come visit your exciting X-ray Universe  
with Chandra! Download the posters here.***
